Exploring Physical Anthropology is a comprehensive, full-color lab manual intended for an introductory laboratory course in physical anthropology. It can also serve as a supplementary workbook for a lecture class, particularly in the absence of a laboratory offering. This laboratory manual enables a hands-on approach to learning about the evolutionary processes that resulted in humans through the use of numerous examples and exercises. It offers a solid grounding in the main areas of an introductory physical anthropology lab course: genetics, evolutionary forces, human osteology, forensic anthropology, comparative/functional skeletal anatomy, primate behavior, paleoanthropology, and modern human biological variation.

anthropology and prehistory, this text exposes students to the many sides of major controversial issues, involving students in the scientific thought process by allowing them to draw their own conclusions. Amidst discussions of bones and artifacts, the text maintains a focus on people, demonstrating to students how biological anthropology and archaeology apply to their lives today. Featuring the latest research and findings pulled from the original sources, this new text is far and away the most up-to-date text available. In addition, the superior art program features hundreds of photographs and figures, and the multimedia presentation options include documentary film clips and lecture launcher videos. Pat Rice, a recipient of AAA's Outstanding Teacher Award and past-president of the General Anthropology Division of AAA, and Norah Moloney, an experienced professor and active archaeologist, present the material in a clear, refreshing, and straightforward writing style.
