BTEC and Heinemann have joined forces to bring students and tutors BTEC's own resources to accompany the new specification - from the BTEC team, for BTEC learners.

The aim of this book is to provide comprehensive coverage of topics in Unit 1 of the BTEC Level 3 course in Information Technology in an interesting and approachable manner. If you are studying this course, you need to notice, read about, experience and analyse the impact and implications of current and emerging digital technologies. Examples and case studies from scenarios and events that have recently been in the news are used to bring the subject to life. Reading and discussing articles from quality newspapers, whether printed or online, discussing relevant TV documentaries, noticing and analysing the use of digital technology in countless aspects of life, as well as learning from a textbook, are all going to contribute to a successful exam result. The book is divided into six sections corresponding to the six Learning Aims outlined in the specification, complementing each of the PG Online teaching resource packs. These sections are divided into between four and eight chapters, each containing material that can be covered in one or two lessons. The chapters have in-text questions which can be used as discussion points in a lesson. An extra chapter at the end of Learning Aim B on "Drawing System Diagrams" will be useful for students faced with a question on the exam for which they are required to draw such a diagram. In addition to almost 100 in-text questions and discussion points, there are over 80 end-of-chapter exercises that are designed to give practice in answering exam-style questions, using command words such as state, describe, explain, analyse. As much practice as possible is needed in answering such questions and getting feedback from the teacher so as to understand how to gain the maximum possible marks in the final exam.

Covers all mandatory and nine optional units, providing the breadth for tutors to tailor the course to their learners needs and interests. Activities in each unit give students plenty of practice to deepen their knowledge and understanding, and grading tips for every activity help them achieve the best possible grade.

This is a complete teaching and learning package for the 2011 specifications helping both students and tutors to get the best results.

This student book includes all four mandatory units plus eight popular optional units providing complete coverage for the BTEC Level 3 National Supplementary Award. Assignment activities give practice for all grading criteria for the units covered, with Edexcel's own assessment tips written by BTEC Level 3 National experts.

Help your students gain the academic expertise and employability skills needed for further progression in education or the workplace with this textbook, fully updated to reflect the new structure and content of the 2016 Level 3 BTEC qualification. - Prepare your students for new external assessment requirements with teaching guidance and tips - Contextualise knowledge and build practical understanding of concepts with case studies - Provide opportunities to stretch and challenge Distinction students - Help students prepare for assignments with activities linked to assessment criteria - Written by expert author team Jennifer Stafford-Brown and Simon Rea

BTEC student book for the 2010 specification BTEC Level 3 National Engineering, giving students a work-focused, approachable textbook, with all the assignment help learners need to achieve the best grade they can.

This Student Book supports the Edexcel BTEC Level 3 National Public Services QCF specification for first teaching from September 2010

Suitable for BTEC National Sport and Exercise Sciences to match Edexcel's 2007 specification, this book covers the curriculum in manageable chunks that link to the specification headings, so that students can be confident that they have covered the underpinning theory they need. It features a full-colour format.
