fundamentals, through the actual on-site and out-of-site of the inspection process. Ideal for use as a key component of any professional fire-inspector training program, this book also serves as an excellent reference for building and property maintenance inspectors whose responsibilities often include fire protection issues."

"A reference manual for both uniformed and civilian inspectors, *Fire Inspection and Code Enforcement* (7th edition) is a comprehensive source of information. This manual educates inspectors about the principles and techniques of fire prevention and life-safety inspection and code compliance. It addresses NFPA® 1031, Standard for Professional Qualifications for Fire Inspector and Plan Examiner, Levels I and II of the 2009 edition. In addition, this manual has also been written to meet the learning objectives of the Fire and Emergency Services Higher Education (FESHE) Principles of Code Enforcement course. This is a reference manual for both uniformed and civilian inspectors."

Principles of Fire Code Enforcement provides a comprehensive overview of the everyday work practices of fire inspectors and the important role they play in fire risk reduction in their communities. The text's easy-to-follow format covers basic and advanced concepts for fire science students, fire inspectors, and fire officers seeking advancement in their fire service careers. Case studies and illustrations help readers understand and implement

File Type PDF Fire Inspection And Code Enforcement 3rd Edition

complex fire code and fire protection requirements and provide insight into practical approaches to improving response and recovery efforts in the community. This text addresses the FESHE requirements for fire code enforcement as well as NFPA 1031 and 1037 knowledge requirements.

The program arose in an attempt to standardize and improve the quality of inspections, seek and correct code violations, and enhance future delivery of services. The program involved personnel development, inspections of targeted properties, and detailed analysis of data collected. A statistical review of violations discovered that 87% of all hazards involved three categories: electrical features, life safety issues, and portable extinguishers.
