CRAN - Package Libra

The Friedland Libra Range - Discontinued.
The Libra range was produced for some 7 years, and was discontinued around June 2006. The range was very popular, and offered a selection of both plug-in and portable models, with distances from 50metres to 200 metres. Unfortunately, Friedland do not offer any spares for this range, and it is impossible to obtain new bell push buttons, or separate chimes.

Libra R-CNN: Towards Balanced Learning for Object Detection

They have a second chance at love, but there are some rough seas ahead in the new contemporary romance from the acclaimed author of Love, Lists, and Fancy Ships
Commitment-phobe Nina Lejeune lives by two rules: 1. Always have fun. 2. Don't rely on anyone but yourself. The first rule is easy; the second, she's only broken once. Ten years after fleeing home, Nina is the chief stewardess on the super yacht Serendipity, single by choice, and perfectly content with how life has turned out. But Nina's ex-coworker and old flame, Irish chef Ollie Dunne, isn't so happy with the status quo. One year after leaving yachting, he's returned as the Serendipity's chef with an ultimatum: if Nina continues to deny she's in love with him by the end of this charter season, he'll go back to Ireland for good. Nina and Ollie's shared secret from their past threatens to shipwreck not only their relationship, but the entire boat. But as their connection grows amidst chaotic guests and crew drama, could there be smooth sailing in their future?

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Turns out that reading nothing but true crime isn't exactly conducive to modern dating—and one woman is going to have to learn how to give love a chance when she's used to suspecting the worst. PhD candidate Phoebe Walsh has always been obsessed with true crime. She's even analyzing the genre in her dissertation—if she can manage to finish writing it. It's hard to find the time while she spends the summer in Florida, cleaning out her childhood home, dealing with her obnoxiously good-natured younger brother, and grappling with the complicated feelings of mourning a father she hadn't had a relationship with for years. It doesn't help that she's low-key convinced her new neighbor, Sam Dennings, is a serial killer (he may dress business casual by day, but at night he's clearly up to something). But it's not long before Phoebe realizes that Sam might be something much scarier—a genuinely nice guy who can pierce through her armor to her vulnerable heart underneath.

“W. G. Sebald exemplified the best kind of cosmopolitan literary intelligence—humane, digressive, deeply erudite, unassuming and tinged with melancholy. . . . In [Campo Santo] Sebald reveals his distinctive tone, as his winding sentences gradually mingle together curiosity and plangency, learning and self-revelation. . . . [Readers will] be rewarded with unexpected illuminations.” —The Washington Post
Book World
This final collection of essays by W. G. Sebald offers profound ruminations on many themes common to his work—the power of memory and personal history, the connections between images in the arts and life, the presence of ghosts in places and artifacts. Some of these pieces pay tribute to the Mediterranean island of Corsica, weaving elegiacally between past and present, examining, among other things, the island's formative effect on its most famous citizen, Napoleon. In others, Sebald examines how the works of Günter Grass and Heinrich Böll reveal “the grave and lasting deformities in the emotional lives” of postwar Germans; how Kafka echoes Sebald's own interest in spirit presences among mortal beings; and how literature can be an attempt at restitution for the injustices of the real world. Dazzling in its erudition, accessible in its deep emotion, Campo Santo confirms Sebald's status as one of the great modern writers who divined and expressed the invisible connections that determine our lives.
