woodlands, roadsides and fallow fields throughout most of the state. In cultivation the species needs sun to partial shade and moist soil. It can grow to 4 feet in height with many stems.

Wildflower Favorites | Missouri Department of Conservation

The field or meadow wildflower garden is different from woodland wildflower gardens. It is composed of a wide range of plants that flower in full sun or must have at least six hours of full sun each day to grow and flower well. Soils for these plants can generally be less fertile and lower in organic matter.
