Sparrows are as complicated as they are common. This is an essential guide to identifying 76 kinds, along with a fascinating history of human interactions with them. What, exactly, is a sparrow? All birders (and many non-birders) have essentially the same mental image of a pelican, a duck, or a flamingo, and a guide dedicated to waxwings or kingfishers would need nothing more than a sketch and a single sentence to satisfactorily identify its subject. Sparrows are harder to pin down. This book covers one family (Passerellidae), which includes towhees and juncos, and 76 members of the sparrow clan. Birds have a human history, too, beginning with their significance to native cultures and continuing through their discovery by science, their taxonomic fortunes and misfortunes, and their prospects for survival in a world with ever less space for wild creatures. This book includes not just facts and measurements, but stories--of how birds got their names and how they were discovered--of their entanglement with human history.

How and when does music become possible? Is it a matter of biology, or culture, or an interaction between the two? Revolutionizing the way we think about the core values of music and human exceptionalism, Hollis Taylor takes us on an outback road trip to meet the Australian pied butcherbird. Recognized for their distinct timbre, calls, and songs, both sexes of this songbird sing in duos, trios, and even larger choirs, transforming their flute-like songs annually. While birdsong has long inspired artists, writers, musicians, and philosophers, and enthralled listeners from all walks of life, researchers from the sciences have dominated its study. As a field musicologist, Taylor spends months each year in the Australian outback recording the songs of the pied butcherbird and chronicling their musical activities. She argues persuasively in these pages that their inventiveness in song surpasses biological necessity, compelling us to question the foundations of music and confront the remarkably entangled relationship between human and animal worlds. Equal parts nature essay, memoir, and scholarship, *Is Birdsong Music?* offers vivid portraits of the extreme locations where these avian choristers are found, quirky stories from the field, and an in-depth exploration of the vocalizations of the pied butcherbird.

Until recently, little was known about the lives of songbirds during their travels from autumn until spring. Now scientists have documented mass migrations over the Gulf of Mexico, identified the voices of migrants in the night sky, and showed how songbirds navigate using stars, polarized light, and magnetic fields. Miyoko Chu explores the intricacies underlying the ebb and flow of migration, the cycle of seasons, and the interconnectedness between distant places. *Songbird Journeys* pays homage to the wonder and beauty of songbirds while revealing the remarkable lives of migratory birds and the scientific quest to answer age-old questions about where songbirds go, how they get there, and what they do in the far-flung places they inhabit throughout the year.

The best ways to attract melodic birds, with insight into their rapidly changing habits The American robin and northern cardinal are two of the best-loved songbirds, but newer backyard arrivals, like rose-breasted grosbeaks and scarlet tanagers, quickly captivate with their vivid colors and unique songs. Bird lovers will learn to attract new visitors by offering treats that songbirds like best, such as soft, easy-to-peck foods that closely mimic caterpillars, their top food preference. And planting just a few carefree perennials and shrubs can provide opportunities for cover and nesting. Sally Roth's *Attracting Songbirds to Your Backyard* draws on the latest science and 50 years of observation to reveal these fascinating details: • In the wee hours, it's the robins that sing first, followed by the babble of house wrens and the whistle of cardinals • Some birds learn birdsongs throughout their lives, while others stop learning once they can mimic their parents' song • It's Dad, not Mom, who teaches the young birds to sing Simple tips, ideas, and recipes, as well as an understanding of why songbirds are coming from the treetops into the backyard, will help any bird enthusiast create a songbird sanctuary.

When Eve Springer arrives to join the Songbirds it's the fulfillment of her lifelong dream. But that dream is soon to become a nightmare. Somebody is murdering the Songbirds, using their own instruments as weapons. Will Eve be next? "Passionate, overwhelming, a classic thriller with a rock rhythm." - Ernesto Gastaldi, screenwriter of *So Sweet... So Perverse* "I read this story with ever-increasing interest. The dynamics and tension felt reminiscent of my thriller films from the 70s and 80s, which have been appreciated by many American directors such as Quentin Tarantino. It would make a great film for lovers of the genre. *Ottimo intrigo!*" - Sergio Martino, director of *All the Colors of the Dark* and *Torso* "Intricately plotted in the classic giallo style, with plot twists and murders galore. John Everson has written a thriller that is sure to appeal to devotees of lurid Italian mystery thrillers." - Troy Howarth, author of *So Deadly, So Perverse: 50 Years of Italian Giallo Films* Somebody is murdering the Songbirds... A modern Giallo, Everson's homage to the stylish Italian mystery thrillers. When Eve Springer arrives in Belgium to study with the world-famous Prof. Ernest Von Klein at The Eyrie, an exclusive music conservatory, it's the fulfillment of a lifelong dream. But that dream is soon to become a nightmare. When the star of the school's piano program is strangled with a piano wire, the only clue to the killer is a grainy picture of the victim during her final moments, mouth wide and screaming, posted on the girl's own Facebook account, alongside a classic music video. What does it mean? Eve soon finds herself taking the girl's place as the enclave's star pupil, in line for a coveted scholarship and a new member of the famed jazz combo, the Songbirds. When Eve is drugged and another Songbird murdered at a campus party, she suddenly finds herself on the list of suspects. Another picture is posted online of the victim in her final moments, and this time, Eve is sure the hands around the girl's throat... are hers! Could she have killed the girl while under the influence of whatever someone had slipped in her drink? The police and others at the Eyrie are suspicious; the murders began when she arrived. Her new boyfriend Richard insists that she could not be the killer. But who would want the Songbirds dead? One of the other Songbirds, like Gianna, the snarky sax player who seems to hate everyone? Or Philip, the creepy building caretaker and occasional night watchman? Or could it be Prof. Von Klein himself, who seems very handy with a camera and has a secret locked room behind his office where the light always seems to be on after dark? Whoever it is, Eve knows she needs to figure it out. Because when a dead canary is left as a bloody message on the keys of her piano, she knows her own life may be in deadly danger. **FLAME TREE PRESS** is the imprint of long-standing Independent Flame Tree Publishing, dedicated to full-length original fiction in the horror and suspense, science fiction & fantasy, and crime / mystery / thriller categories. The list brings together fantastic new authors and the more established; the award winners, and exciting, original voices.

Learn more about the variety of fascinating ways animals sleep: from upside down and holding hands, to sleeping while swimming or flying! Did you know otters sleep while holding hands; zebra finches rehearse their songs while dreaming; ducks and dolphins sleep with one half of their brains at a time; and, frigate birds sleep while flying? *A Songbird Dreams of Singing: Poems about Sleeping Animals* is a book of poetry with a scientific-and child-friendly-underpinning. With a poem for every animal, followed by a paragraph explaining the fascinating science behind how that animal sleeps, this artfully compiled book captures the wonder of our ecosystem. Designed with the look of a classic storybook/collection, with special effects on the cover, the book makes the perfect gift for young children!

Provides easy access to the most complete voice of the Black Arts and Black Consciousness movement.

Point counts of birds are the most widely used quantitative method and involve an observer recording birds from a single point for a standardized time period. In response to the need for standardization of methods to monitor bird populations by census, researchers met to present data from various investigations working under a wide variety of conditions, and to examine various aspects of point count methodology. Statistical aspects of sampling and analysis were discussed and applied to the objectives of point counts. The final chapter presents these standards and their applications to point count methodology.
