Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews.

Mobiles magazine est depuis 1997 le magazine de r é f é rence en langue fran ç aise sur les t é l é phones mobiles, avec plus de 15.000 pages publi é es et 1.000 tests de produits depuis le n ° 1. Tous les mois, Mobiles magazine d é crypte les tendances, teste les nouveaux mod è les et apporte à ses lecteurs le meilleur des informations pratiques pour ê tre à la pointe des usages et produits mobiles.

For the first time, this book provides an up-to-date history of product design and product design law covering 17 countries — Japan, Korea, China, Singapore, the United Kingdom, Germany, France, Italy, the Nordic countries (Denmark, Finland, Iceland, Norway and Sweden), Russia, the United States, Brazil and Australia — selected for their innovative or influential approach to design or design protection. Each country is the subject of two chapters — one on the history of design and the other on the history of design law — authored by experts in design and intellectual property (IP) law. This unique interdisciplinary approach explains why and how various national design protection systems (that can include design, copyright, trade mark, competition and civil laws) developed, making it an ideal book for students, researchers and lawyers. The book also serves as an international survey of different national policy and legal responses to historical developments and specific design and legal issues allowing readers to consider their advantages and disadvantages — and so is also recommended for policy and law makers, as well as organizations that administer IP rights. Topics include the subject matter of design protection; procedural and substantive requirements; design registration; infringement; and the overlap of design rights and other IP rights. The chapters on design history provide further context to the historical development of these legal concepts by considering major design movements, key designers and iconic designs and the current state of design. The chapters highlight the connected and often complementary relationship between the two histories, not only for each country, but at the regional and international level, often as a result of government policies, trade, colonialism, immigration and globalisation. Design and design practice continue to become more global and evolve with developments in technology. At the same time, design laws are not internationally harmonized and continue to develop at the national level, with a number of significant changes occurring in recent years. This timely book shows how the lessons of the past continue to inform the future direction of design and the legal systems developed to protect it.

Provides an evolutionary perspective on the origin of products. Offers a method to give designers directions in New Product Development.

This Brief focuses on strategies for innovation. Top-Down Innovation discusses the barriers to successful organizational and product innovation, distills the leading theories about how to foster innovation, and presents six case studies of well-known brands that have succeeded (and in one case failed) in meeting innovation challenges. Synthesizing the lessons learned from companies that have mastered innovation over time, it provides a new perspective on the role of market-leading companies and top management in driving innovation. Since the publication of Clayton Christensen ' s pioneering Innovator ' s Dilemma in 1997, the rules of innovation have themselves been transformed. Today, innovation frequently starts at the CEO level with a vision that percolates throughout the organization. In contrast to traditional theories of technology disruption, new market entrants, and business model innovation, this study concludes that vision and leadership at the top is a decisive factor in successful innovation initiatives.
