In Supercarrier, both Captain Keyes and Lieutenant Husher are representatives of this dilemma, and the human species almost comes to an end as a result. At one point, Keyes asks Husher if he will obey his orders, to which Husher replies "Yes, if they're the right ones" or other words to the same effect. It's good to see this point made.

Sensational Science Fiction with layers and layers of deceit infiltrated by layers and layers of truth and crazy heroism. Greed, power, subterfuge and wealth rules with honesty, love, collaboration and integrity only exhibited by a few.

Captain Keyes captains the Providence, the last human ship not dependent on dark tech, which humanity has used to rule the galaxy for decades. When dark tech fails, allies become enemies. Meanwhile, humanity's oldest enemy is on the rise. The future now depends on Captain Keyes and his misfit crew.

The Galaxy's Doomed Without Him The Ixa smashed the galaxy to bits before they were defeated. Captain Husher has sounded the alarm in the decades since: the Ixa's creators will return to finish the job. But unlike Husher, the galactic government didn't battle the Ixa, and the politicians have convinced themselves that maintaining peace means limiting the ability to wage war. Now, the enemy has returned, with high-tech weapons that prove they haven't limited their own combat capabilities in the slightest. If Captain Husher and his beleaguered supercarrier crew can't manage to stop the invaders, they will happily devour the galaxy whole. Fans of Daniel Arenson and Jay Allan will love Capital Starship, a new military science fiction series set in the Ixan Prophecies universe.

In this prescient thriller about an all-too-possible scenario, a man fights to keep his family alive when a cyberworld meltdown and fierce storms cut New York City off from the world. Mike Mitchell is an average New Yorker living in an apartment in Chelsea, struggling to keep his family together. When the Internet goes down, he suddenly finds himself fighting just to keep them alive. The electricity and power supplies fade in and out, and the explanations offered by the authorities are vague and untrustworthy. A string of increasingly bizarre disasters starts appearing on the world's news networks, and a monster snowstorm hits New York City before Christmas. Mike and his close friends and family hunker down in their apartment building for safety, organizing and rationing food and water. Outside, the boundaries between lawful and criminal behaviour break down as resources become scarce. With the threat to their safety growing, Mike and his family pin their hopes on fleeing the city for the countryside. But as the world and cyberworld come crashing down, New York is suddenly cut off, turning the city into a wintry tomb where nothing is what it seems, and where no one can be trusted . . .

In a frozen world of magic, shapeshifters, and organized crime, two police officers find a figure out of legend and go on a quest that will change their lives.

A remote planet, rich in resources... A drug-addicted captain, hungry for bonuses... A hidden alien menace... Growing up as a Martian on Earth has left Jas Harrington solitary, quick-tempered, and with zero tolerance for fools. All plus points when working as chief security officer aboard prospecting starships. Jas' latest berth is aboard the Galathea, which trawls the reaches of the galaxy seeking precious minerals and rare resources. She thinks it's a routine trip. She's wrong. An inspection of a far-flung planet leaves Jas suspicious that there's more to the place than meets the eye. If only she could convince the captain of the need for caution, but she might as well wish for a tasty meal in the ship's canteen. When the captain disciplines Jas for insubordination, she has only two allies: a timid navigator and the second pilot, who has the hots for her. Not that Jas notices. All hell breaks loose, and Jas' skills are put to the ultimate test. Can she enlist the help of the only two friends she has? She's in a race against time to prevent the aliens from achieving their goal: Generation. If she fails, the ship's crew, the galactic empire, and humanity itself are at risk.

The SMASH HIT SERIES now being developed at SYFY channel -- coming soon from NBC/Universal! Death Has a Brand New Appetite... When overweight treadmill salesman Reginald Baskin finally meets a co-worker who doesn't make fun of him, it's his own bad luck that tech guy Maurice turns out to be a two-thousand-year-old vampire. And when Maurice turns Reginald to save his life, it's just Reginald's further bad luck that he wakes to discover he's become the slowest, weakest, most out-of-shape vampire ever created -- doomed to "heal" to his corpulent self for all of eternity. But as Reginald struggles with the downsides of being a fat vampire (too slow to catch people to feed on, mocked by those he tries to glamour, assaulted by his intended

prey, and left for undead), he discovers rare powers in himself that few vampires have and just in time, because the Vampire Council wants him destroyed as an inferior representative of their race. Read the first book of Johnny B. Truant's blockbuster series, and you'll never look at vampires (or vampire stories) the same way again. "Laugh out loud funny and the laughs just keep coming. I am in for the whole series because I need to know what happens next to Reginald, the Fat Vampire. It is absurd, and yet oddly comforting and believable that even the Vampire world has out of shape and awkward individuals." -- AJ "I love a good vampire novel and Johnny B. Truant delivers on all levels. Humorous, suspense, action, gore, love story... it has all of these and excels at them. Twists and turns near the end of the story had me shouting out loud in my head towards certain characters and cheering Reginald, Maurice, and Nikki on! Looking for a new vampire story to sink your fangs into... buy this book!" -- Christian Burch "Truant has authored the most unique vampire novella I have ever read... I sincerely predict The Fat Vampire would become a most popular television series when producers learn of Truant's work." -- vinnieg "Just when you think you'll never find a vampire novel again that doesn't involve bloodsuckers that look like they moonlight at American Apparel, here comes Reginald, 350-lb. office worker who, because he's in the wrong place at the wrong time, is turned into a vampire; now he's destined to be the out of shape, fat slob he's been all his life... forever. What, you thought he'd suddenly turn into Edward Cullen?" -- Phoenix59 "Reginald is a very relatable character. He's been hammered down his whole life because of his weight, and he just doesn't see an end in sight. Even after being turned into a vampire things are looking down. But despite everything he perseveres. Having grown up over-weight myself I felt this character was a great role-model, despite a few instances where let his stomach make decisions for him." -- Michael Loring Perfect for fans of Rick Gualtieri's Tome of Bill series or Drew Hayes' Fred the Vampire Accountant series, Fat Vampire is the story of an unlikely hero who, after having an imperfect eternity shoved into his grease-stained hands, must learn to turn the afterlife's lemons into tasty lemon danishes. 'Who could have anticipated that the collective artificial intelligence that was the Starweb would turn against its creators? Who would have thought artificial intelligence could create its own bizarre religious cult?' Brilliant in concept and execution, the Starweb must have seemed to the Samarcians the perfect solution to their communication needs. However, the Starweb labelled itself the Guardian of God and set upon a war of genocide against its creators. Our story begins on March 15th 2045, the day our world was invaded and enslaved by a military dictatorship more viscous and evil than any regime ever seen here on Earth. Two years later, resistance fighters; inspired by Moss Pendragon and Paul Jenson; raised the ancient starship Excalibur and finally defeated the Dyason fleet in the Battle for Liberation. The Dyason home world had been ravaged by years of industrial waste and pollution. They had invaded Earth because their own planet was on the verge of environmental collapse. Moss, Jenson and their expeditionary team helped overthrow a cruel and corrupt Dyason Imperial military government. In response, the Dyason military raised their own super-starship, 'Dominator'; which took part in the second great Dyason space-battle. Dominator was lost in a bizarre space-warp at the end of the second Dyason War. The 'Dominator' found itself at 'Extremity Station, ' an outpost at the edges of our galaxy; built by ancient race of humanoids called the Samarcians. Equipped with an artificial intelligence, Extremity Station was designed to be self-sustaining, able to communicate with the rest of Samarcia via a network of other 'AI' computers. These super-quantum computers were able to communicate via the sub-ether and were collectively known as the 'Starweb'. Brilliant in concept and execution, the Starweb must have seemed to the Samarcians, the perfect solution to their communication needs. However, the Starweb turned against its creators, creating its own bizarre religious cult. The Starweb labelled itself the Guardian of God and set upon a war of genocide against its creators. The Samarcians, unaware of what was happening until it was too late, were slaughtered in their millions! The Starweb having wiped out human races from virtually the entire galaxy, followed the Dominator back to Dyason and engaged the new three-race alliance. Thanks to the courage of the World Defence Force, Dyason Freedom Fighters, and the survivors of the Helgision race, the Guardians of God were defeated in the last great space-battle of the Dyason Wars. It was a desperate

struggle which eventually lead to the realisation that all humans must learn to live and work together if they are to defend themselves from the warped and evil Starweb. That all happened nearly five years ago; since then Earth has had to adjust to the fact that they are not the only human race in the universe. Humans are all part of a family, that includes the Dyason and Heligion people. Who knows how many other human races, if any, have survived the acts of genocide carried out by the Starweb? There has been no sign of the Starweb since their defeat above Dyason, and perhaps humanity has become a little complacent-secure in the belief that the brand-new Three-World-Fleet of super battle-cruisers will defeat any new attack by the Guardians of God . However, whilst people have been getting on with their day-to-day lives, new evidence suggests that there is an ongoing attack by the Starweb. But this attack does not come in the form of starships and space-fighters; this attack is far more subtle than that! 'Tonight here at CNK news network, we prove to you that the enemy is within!'
